## Claims:

- 1. (Currently Amended) A stocking comprising a sleeve and a <u>moldable</u> gel pad within said sleeve.
- 2. (Currently Amended) A stocking as claimed in claim 1 further comprising an opening in said sleeve for accessing, placing and positioning said moldable gel pad within said sleeve.
- 3. (Currently Amended) A compression stocking comprising a sleeve and a moldable gel pad within said sleeve.
- 4. (Currently Amended) A compression stocking as claimed in claim 3 further comprising an opening in said sleeve for accessing, placing and positioning said moldable gel pad within said sleeve.
- 5. (Original) A stocking as claimed in claim 2 wherein said stocking includes a folded portion and a stitched portion to form said sleeve.
- 6. (Original) A compression stocking as claimed in claim 4 wherein said compression stocking includes a folded portion and a stitched portion to form said sleeve.
- 7. (Original) A stocking as claimed in claim 5 wherein said sleeve extends 360 degrees within said stocking.
- 8. (Currently Amended) A compression stocking as claimed in claim 6 wherein said sleeve extends 360 degrees withing within said stocking.

- 9. (Currently Amended) A device for treating venous insufficiency comprising an understocking having a sleeve and a moldable gel pad within said sleeve.
- 10. (Currently Amended) A device for treating venous insufficiency as claimed in claim 9 further comprising an opening in said sleeve for accessing, placing and positioning said moldable gel pad within said sleeve.
- 11. (Original) A device for treating venous insufficiency as claimed in claim 10 further comprising a compression stocking residing over said understocking.
- 12. (Original) A device for treating venous insufficiency as claimed in claim 9 further comprising a compression stocking residing over said understocking.
- 13. (Original) A device for treating venous insufficiency as claimed in claim 9 wherein said understocking includes a folded portion and a stitched portion forming said sleeve.
- 14. (Original) A device for treating venous insufficiency as claimed in claim 13 wherein said understocking is made from a material selected from the group of nylon, polyester, and cotton.
- 15. (Original) A device for treating venous insufficiency as claimed in claim 13 wherein said understocking is made from a material selected from an elastic material.
- 16. (Currently Amended) A method of treating a patient having venous insufficiency comprising the steps of:

applying an understocking having a sleeve onto the foot, ankle and leg of said

8142-AMD-6-20-07.wpd June 20, 2007 (4:16pm)

patient;

inserting a moldable gel pad into said sleeve; and,

positioning said moldable gel pad about said foot, ankle and leg of said patient to apply pressure to reduce said venous insufficiency.

17. (Currently Amended) A method of treating a patient having venous insufficiency as claimed in claim 16 further comprising the steps of:

applying a compression stocking over said understocking and said moldable pad

- 18. (Original) A method of treating a patient having venous insufficiency as claimed in claim 16 wherein said understocking is a compression stocking.
- 19. (Original) A method of treating a patient having venous insufficiency as claimed in claim 17 wherein said understocking is a compression stocking.
  - 20. (Cancelled)
- 21. (New) A stocking as claimed in claim 1 where said moldable gel pad is comprised of a material that is soft and pliable.
- 22. (New) A stocking as claimed in claim 2 wherein said stocking fits over a bodily appendage; said bodily appendage has an exterior surface; said exterior surface has surface contours; and, said moldable gel pad is small and thin; said moldable gel pad is placed in said sleeve in proximity to said surface contours; said moldable gel pad is compressed; said moldable gel pad is fit in said surface contours of said appendage.

8142-AMD-6-20-07.wpd June 20, 2007 (4:16pm) Jun.21. 2007 6:15PM 4402567453

No.3105 P. 9

23. (New) A compression stocking as claimed in claim 3 wherein said stocking is placed over a bodily appendage; said bodily appendage has projections; said moldable gel pad is held into place in a location in proximity to said projections of said bodily appendage to provide the desired distribution of pressure between said compression stocking and said bodily appendage.

24. (New) A stocking for use in combination with a bodily appendage, said bodily appendage has surface irregularities, said surface irregularities include bony prominences and recesses said stocking includes a compartment and a moldable gel pad; said moldable gel pad positioned in proximity to said surface irregularities.
